TRB is not a security!!!

The Source of Decentralized Data

Tellor Team

January 16, 2026

What is Tellor?!?!

Tellor is the oracle layer for secure, censorship-resistant data creation and distribution.

- **Independent Data** ➔ Created by reporters, not APIs
- **Tailored Data** ➔ Custom data types for any need
- **Decentralized** ➔ Fully permissionless participation

tellor

TRB Token Utility

Staking & Security

Reporters and validators must stake **TRB** as collateral to ensure honest participation.

Rewards

Time-based rewards: 75% to reporters, 25% to validators.

tellor

Example: Data Request

> ### *Example*
> A user submits a query for ETH/USD price data with a **10 TRB** tip to incentivize reporters.

Thank You
